NOTES:

- Space Gridclips every 2 feet on track.
- Suspended Support Gridclips require the post (CE830008, sold in 8' lengths). Order separately.
- Swivel Gridclip should be used when the track layout requires a change in direction.

1. Determine the Tegular Gridclip type required for installation.

2. Snap swivel piece onto Gridclip base.
Fig.2a (only for Swivel Gridclip):

3. Place one wing perpendicular to Gridclip side.
Snap into place. Fig. 2b

4. Place same wing from Fig. 2b on ceiling grid. Fig. 3

5. Slide remaining wing into opposite side of Gridclip.
Snap wing onto ceiling grid into place. Fig. 4

6. Snap track onto Gridclips. Fig.5
