# the story

Located in suburban Orlando, the Goddard School® for Early Childhood Development was developing their new 11,000 sq. ft. building. The Goddard School philosophy implements a variety of teaching methods that prioritize areas of child psychology and neurology to create individualized learning experiences. Needing protective products that could withstand the high-traffic educational environment and keep up with their innovative practices, Inpro was the best choice to serve the school, its students and its staff.

# the project

Architect: Jarmel Kizel Architects  
Livingston, N.J.

## Inpro® Products Used

An array of products were installed, including:

### Commercial Window Treatments

[VIEW PRODUCTS](#) Roller Shades

### Door + Wall Protection

[VIEW PRODUCTS](#) 160 BluNose® Corner Guards

# the results

---

Because crafting an unique, safe and nurturing learning environment was paramount to the Goddard School, multiple Inpro products were used in its construction. From our corner guards protecting the rock-climbing wall edges to our commercial window treatments adding privacy and UV protection to classrooms, Inpro was pleased to enhance the students' learning spaces.

## **obsessed with protecting buildings®**

How they look. How they function.  
And how they protect the health and safety  
of the people who use them every day.

That's why we make hundreds of architectural  
products all under one roof and work tirelessly to  
make sure you and your buildings succeed.

Yeah, we are obsessed. But we wouldn't  
have it any other way.
