Project Profile

Architect: Canon Design

Contractor: Laing O'Rourke
Innisfree Ltd
Obrascon Huarte Lain S.A. (OHL)
Dalkia Canada Inc.

The Project

Occupying two full blocks in the heart of downtown Montreal, the Centre Hospitalier de l'Université de Montréal (CHUM) is the largest healthcare construction project currently being built in North America. Born from the merger of three hospitals, CHUM replaces outdated facilities and brings these entities together in a single-site institution.

Inpro® Products Used

- UltraCube® track with Safety Loading Units
- Shield by Panaz® fabric in custom Gray Brushstroke
- Super Bio Stat™ shower curtains

obsessed with protecting buildings®
