inpro®

the story

In the heart of Milwaukee, Wisconsin, Children's Wisconsin Pediatric Intensive Care Unit (PICU) is committed to providing critical care for its youngest patients. To meet growing healthcare demands, the PICU underwent a 28,000-square-foot renovation and expansion on the fourth floor of its main campus, including 20 patient rooms and supportive spaces like a Family Support Lounge, Provider Workrooms, and a Child Playroom. Inpro partnered with the medical center to deliver privacy and durability-focused interior solutions.

Palladium® Rigid Sheet

the results

Inpro's products played a vital role in transforming the PICU into a modern, resilient care environment. Shield by Panaz® cubicle curtains and Optitrac® cubicle tracks were strategically installed in all patient rooms to ensure enhanced privacy and seamless staff operations. Palladium® rigid sheet and wall guards were applied to walls in high-traffic areas such as hallways and shared staff rooms, providing a durable and aesthetic finish. Additionally, corner guards were integrated into vulnerable spots like doorways and room corners, offering vital protection against daily wear and tear. These features combined to create a welcoming, functional space that balances safety with design elegance—supporting exceptional care for children and their families.

obsessed with protecting buildings®

How they look. How they function.
And how they protect the health and safety
of the people who use them every day.

That's why we make hundreds of architectural
products all under one roof and work tirelessly to
make sure you and your buildings succeed.

Yeah, we are obsessed. But we wouldn't
have it any other way.
