

Project Profile

# Board Rooms at Atrium Health.

Charlotte, NC

Architectural Products

**inpro**®

## Project Profile

### The Team

Inpro Charlotte sales staff worked directly with the Design & Construction Team from Atrium Health, which acted as project manager. Products were installed by Inpro® Installation Services.

### The Project

Addition of draperies in the main and adjunct board rooms at the Atrium Health corporate headquarters in Charlotte. The goal was enhanced aesthetics and acoustics in the spaces.

### Inpro® Products Used

In both rooms, stationary side panels at 100% fullness with a regular lining were installed in the following spaces. Drapes in both rooms had to accommodate existing motorized shades, as well as 1" blinds, which were retained for a uniform building appearance.

**Large Main Board Room:** Momentum Textiles Charm Pewter

**Adjunct Board Room:** Fabricut® Galaxy Dove

Challenge in this room was the addition of accent lighting in the pocket, which called for close coordination with the job superintendent as to the location of the lighting fixtures and the window treatments.
