Project Profile

Architect: by Aedas, with HDR serving as project architects
Contractor: Sixco-Samsung (Joint Venture)

The Project

Cleveland Clinic Abu Dhabi is a 23-acre facility with five clinical floors, three diagnostic and treatment levels and 13 floors of critical and acute inpatient units. This 364 (expandable to 490) bed facility is a unique and unparalleled extension of US-based Cleveland Clinic Model of Care, providing direct access to the world's best healthcare, reducing the need for patients in the region to travel abroad for treatment. It is currently one of the largest healthcare facilities in the Middle East.
