# the story

A luxury apartment complex in Green Bay, Wisconsin erected in the area near the iconic professional sports stadium involved multiple contractors and installers throughout its construction. The interior and exterior systems located within required both reliable performance and a modern aesthetic to ensure safety of its occupants, while looking nice in the bustling community it surrounded. For the podium deck portion of the project, functionality was the driving force, having to maintain a fire-rating while keeping the parking area below dry from the weather above. With hands-on field expertise and products from Inpro, this beautiful complex now stands as a sight to behold in the busy district.

# the project

Architect: NBBJ, Columbus, OH

Contractor: Miron Construction + Pepper Construction

Installer: Miron + Alpha Insulation and Waterproofing

## Inpro® Products Used

An array of products were installed, including:

### Expansion Joint Systems

[VIEW PRODUCTS](#)

615 Series Exterior Expansion Joints

995 Fire Rated Foam

Fireline® 140 Fire Barriers

801 Series Floor Expansion Joint Covers

811 Series Wall + Ceiling Expansion Joint Covers

# the **results**

Fire-rated expansion joint systems are located throughout the beautiful green space of the complex with people walking over them every day, never knowing they exist. They are a great example of the best type of expansion joint application – one that is never seen. Inpro was able to provide safe building materials while also bringing modern design elements to the living space.

## **obsessed with protecting buildings®**

How they look. How they function.  
And how they protect the health and safety  
of the people who use them every day.

That's why we make hundreds of architectural  
products all under one roof and work tirelessly to  
make sure you and your buildings succeed.

Yeah, we are obsessed. But we wouldn't  
have it any other way.
