the **story**

Gerald R. Ford International Airport continues to grow, surpassing 4 million passengers in 2024— a historic milestone. To support its growth, the airport expanded and widened Concourse A in Spring 2024, introducing eight new gates along with enhanced concessions, upgraded retail options, and modern amenities. With these upgrades, the project showcases a more spacious, efficient, and passenger-friendly environment that strengthens GRR's role as a key gateway to West Michigan.

Expansion Joint Systems

VIEW PRODUCTS	426 Series	Fireline® 140 Fire Barrier
	501 Series	1200 Series
	801 Series	300 Wall Series
	432 Series	115 Ceiling Series

Door and Wall Protection

VIEW PRODUCTS	Aspex® Printed Wall Protection
-------------------------------	--------------------------------

Aspex® Printed Wall Protection

the results

Various Inpro Expansion Joint Cover systems were utilized to contribute to the facility's durability and functional integrity against natural movements and the rigors of every day traffic. The custom Aspex® Printed Wall Protection enhances the new Sensory Room, designed to support travelers with sensory sensitivities. It was carefully selected to replicate an airplane interior in the Airplane Simulation Zone, creating a calming space to ease anxiety about flying.

obsessed with protecting buildings®

How they look. How they function.
And how they protect the health and safety
of the people who use them every day.

That's why we make hundreds of architectural
products all under one roof and work tirelessly to
make sure you and your buildings succeed.

Yeah, we are obsessed. But we wouldn't
have it any other way.
