- Commercial & Retail
- Education
- Entertainment & Hospitality
- Healthcare
- Industrial
- Multi-Family

### The Project + Inpro® Products Used

RVA sought to reduce glare and solar heat gain in their office, and chose Inpro's WebbGlide® Roller Shades in 1% openness Charcoal Gray fabric mounted on Dove Gray track.

**“**Inpro was great to work with for our window shades throughout our office. The Inpro team was extremely helpful to get us the right product to best serve our team, and they continued that great service through providing recommendations, estimates, samples, and tracking all along the way. We've been happy to specify Inpro products in our firm for years, but it was great to experience it firsthand and we couldn't be happier.”
