the **story**

As the flagship public university of the state, the University of New Hampshire is nationally recognized for its dedication to research, innovation, and hands-on learning. At the heart of its Durham campus, Spaulding Hall serves as a hub for biological sciences, offering students and faculty an immersive environment to explore the natural world. When it came time to modernize the facility, the university sought solutions that would not only elevate the space aesthetically but also reflect the academic focus of the building itself. Inpro partnered with the university to bring this vision to life through custom-designed architectural solutions.

Aspex® Printed Wall Protection

Aspex® Printed
Wall Protection

the **results**

By incorporating Inpro's Aspex® Printed Wall Protection, Spaulding Hall was transformed into a vibrant, nature-inspired space that visually reinforces the university's commitment to biological sciences. The custom imagery—featuring butterflies, flowers, birds, insects, and plant life—creates an immersive environment that both educates and inspires. In addition to its striking aesthetic, Aspex offers durable protection against everyday wear, ensuring that the installation maintains its visual impact while supporting the facility's long-term maintenance goals.

obsessed with protecting buildings®

How they look. How they function.
And how they protect the health and safety
of the people who use them every day.

That's why we make hundreds of architectural
products all under one roof and work tirelessly to
make sure you and your buildings succeed.

Yeah, we are obsessed. But we wouldn't
have it any other way.
